Year **1976** is not only a date for **S.T.M.** It represents the starting of a small company that is today an **important reference point in the mechanical transmission field**, thanks to the entrepreneurial capabilities (**from foundation members Girotti Tiziano, Vignoli Altero and Lucchini Giuseppe**), expertise and firm commitment of the promoting partners. S.T.M. over 90' has turned from a craftsman like expression into a **big industrial company specialized in the design and manufacturing of speed reducers.**

S.T.M. is nowadays well known in national and international markets in which has reached a respectful position.

In **1966 G.S.M.** started as a small company on the experience of it's founders.

The company expertise of special industrial gearboxes becomes an industrial **company in 2000 after STM bought it.**

Since year 2000 **G.S.M. invested a lot on products and technologies** in order to become one of the European manufacturer's leader for medium-big industrial gearboxes.
